

# 137

Husqvarna 137 is our smallest chainsaw and is intended for leisure and part-time use. Our main focus, as always, is on the user and the work environment and our demands on safety, function, ergonomics and reliability are as important as our demands on our tools for forestry professionals. Very easy to start thanks to a new spring-assisted starter mechanism. Standard-equipped with our LowVib chain.

### Air Injection

Centrifugal air cleaning system for longer intervals between filter cleans, smoother operation and reduced wear.

### The two mass principle

Vibration damping with the handles isolated from the engine.

### Better grip

Angled front handle for better grip and natural working position.

### Safer to use

Double acting chain brake, right hand guard and chain catcher make the saw safer to use.

### Easy to work with

The slim body, high center of gravity and flat underside make our saws easy to work with.

### Three-piece crankshaft

Forged three-piece crankshaft for maximum durability for the toughest applications.

## 137

Cylinder displacement	2.2 cu.inch / 36.3 cm <sup>3</sup>
Maximum recommended engine speed	13 000 rpm
Fuel tank volume	0.85 US pint / 0.411
Oil tank volume	0.42 US pint / 0.201
Oil pump type	fixed flow
Chain pitch	.325"
Recommended bar length	13-15" / 33-38 cm
Sound level	98 dB(A)
Noise emissions, L <sub>WA</sub>	118 dB(A)

## Advantages

- Low noise level
- Low weight on all moving engine parts means fast acceleration.

Vibrations, front/rear handle      4.9 m/s<sup>2</sup> / 7.7 m/s<sup>2</sup>

Weight without cutting equipment      10.1 lbs / 4.6 kg
